S&A Proposal No. 2017-74*

Dear Mayor and Council:

Sickels & Associates, Inc. would like to thank you for the opportunity to offer this proposal for surveying and engineering services in connection with the above referenced project.

The Borough intends to install cured in place pipe (CIPP) lining for the existing 24" terra cotta storm pipe that extends from an inlet in W. Center Street through 123 W. Center Street, to an existing inlet at the rear of 125 W. Center Street. The purpose of the CIPP lining is to stabilize the existing pipe which experiences operational problems during heavy rain fall events, and must be stabilized.

Therefore, we have prepared the following proposal for the various engineering services that we anticipate will be required on the above referenced project. Said services are based upon Sickels & Associates, Inc.'s understanding of the project as described herein.

For ease of review, the proposal is organized in the following manner; Our Understanding of the Project, Description of Services, Consulting Fee and Terms and Conditions.

### **OUR UNDERSTANDING OF THE PROJECT**

The project will involve preparing bid specifications for CIPP lining of approximately 125 linear feet of 24" terra cotta main on 123 W. Center Street. A contractor will be hired to install a CIPP liner within the pipe to reestablish the structural integrity of same. We understand the Borough Public Works Department will complete all excavation and restoration work to allow the contractor to gain access to the storm pipe along W. Center Street.

**September 7, 2017**

Our approach to this project as outlined in the Description of Services consists of the following three (3) phases.

- PHASE I      Final Construction Specifications
- PHASE II     Bid Administration
- PHASE III    Contract Administration/Construction Observation

For the purpose of defining the extent of services which may be required for completion of the engineering and design of this project, this proposal assumes that all necessary construction will be let out for public bid. As such, contract documents and technical specifications required for public bidding purposes will be prepared.

Our proposal does not include performing test pits to verify locations of utilities and services, nor does it include a soil investigation program to identify subsurface soil conditions and groundwater levels in. In addition, this proposal does not include any video inspection services for a pre-design pipe evaluation. Sickels & Associates, Inc. will provide a proposal if such services are deemed necessary.

### **DESCRIPTION OF SERVICES:**

Based on the above project description, our scope of services will include the following activities:

#### **PHASE I                      FINAL CONSTRUCTION SPECIFICATIONS**

The scope of this Phase includes preparation of final bid specifications for construction purposes:

#### **SECTION 1.0      FINAL BID SPECIFICATIONS**
