S&A Proposal No. 2022-29*

Dear Mr. Sawyer:

Sickels & Associates, Inc. would like to thank you for the opportunity to offer this proposal for engineering and construction management services in connection with the above referenced project.

It is our understanding that the Borough wishes to proceed with the watermain replacement at the above referenced roadways and road resurfacing work for both roadways. We understand the work will be funded through a CDBG grant and the Borough staff will complete the watermain installation. We further understand the milling and resurfacing of the roadway will be contracted through a County Public Works Department Co-op agreement.

We understand our scope of work will include assembling the applicable CDBG bid documents for their approval, verification of wage rates for the milling and resurfacing contractors, observation of the milling and resurfacing work, obtaining pre and post photographs of both roadways and the close out documents for the CDBG Program.

Belview Avenue will be paved from Madison Avenue to Roberts Avenue. Roberts Avenue will be paved from Belview Avenue to NJSH Rt. No. 47. We understand the milling and paving will stop short of the handicap ramps installed along NJSH Rt. 47. Therefore, no handicap sidewalk ramps will be part of this scope of work. The handicap ramps have been replaced by the NJDOT and are not in need of replacement.

Due to the nature of the shared County contract, we are aware additional roadways may be added to the resurfacing program to provide sufficient volume of work for the County Contractor. Unless otherwise notified, we understand the Public Works Department will provide the construction observation of the additional roadways.

We have prepared the following proposal for the various engineering and inspection services that we anticipate will be required on the above referenced project. Said services are based upon Sickels & Associates, Inc.'s understanding of the project as described above.

For ease of review, the proposal is organized in the following manner; Description of Services and Consulting Fee.

For the purpose of defining the extent of services which may be required for completion of the engineering and construction management, this proposal assumes that all necessary construction will be performed by the Clayton Public Works Department or through the County Public Works Department Co-op program. As such, contract documents and technical specifications required for public bidding purposes are not included within this scope of approval. It is our understanding no construction plans will be proposed for this project.

Our proposal does not include performing test pits to verify locations of utilities and services, nor does it include a soil investigation program to identify subsurface soil conditions and groundwater levels. Sickels & Associates, Inc. will provide a proposal if such services are deemed necessary.
